

DISTRICT HEATING AND COOLING including the integration of CHP

A photograph of a yellow excavator working in a field, with a large pile of earth in the foreground. The image is overlaid with a blue tint.

District Heating Futures
Gustavelund, Tuusula, Finland
31 August/1 September 2009

Dr Robin Wiltshire
Chairman IEA-DHC

District Heating Futures

- **A workshop/seminar**
- **Themed to examine different aspects**
- **Existing built environment; new buildings; thermal storage and renewables**
- **Lots of time for audience participation, questions and debate**
- **Starting with overview and ending with panel debate.**

District Heating Futures

- **Hosted by the District Heating and Cooling programme...**
- **which is an 'implementing agreement' operating under the auspices of the International Energy Agency**
- **With guidance from the Building Coordination Group (the buildings-related implementing agreements)...**
- **and with active programme participation of ECBS, ECES and DSM...**
- **all of which are implementing agreements.**

Issues, comments, and ideas for future research

- **Please note down any issues, comments, and ideas you have, and let us have them at the end of the day...**

Thanks to

- **All the speakers who have agreed to participate**
- **The organisers here in Finland**
- **All of you who have taken the time to come here**
- **Wishing us an interesting, challenging and interactive two days!**
