

Published articles and papers on IEA DHC Annex TS1 (or within the frame of TS1)

Blesl, M., Stehle, M. and Broydo, M. (2016). Technical, Ecological and Environmental Evaluation of Different District Heat Supply and Space Heating Concepts. In: CLIMA 2016 - 12th REHVA World Congress, 22-25 May 2016, Aalborg, Denmark, 8 pages.

Kallert, A.M. and Schmidt, D. (2016). Simulation and Exergetic Analysis of Renewable Multi-Generation Units for a Building group. In: CLIMA 2016 - 12th REHVA World Congress, 22-25 May 2016, Aalborg, Denmark, 8 pages. ISBN: 87-91606-36-5

Kuosa, M., Aalto, M., Assad, E.H., Tapio, M., Lampinen, M. and Lahdelma, R. (2014). Study of a district heating system with the ring network technology and plate heat exchangers in a consumer substation. In: Energy and Buildings, Vol. 80, pp.276-289.

Kuosa, M., Kontu, K., Mäkilä, T., Lampinen, M., Lahdelma, R. (2013). Static study of traditional and ring networks and the use of mass flow control in district heating applications, In: Applied Thermal Engineering, Vol. 54, pp.450-459.

Laajalehto, T., Kuosa, M., Mäkilä, T., Lampinen M., Lahdelma, R. (2014). Energy efficiency improvements utilising mass flow control and a ring topology in a district heating network. In: Applied Thermal Engineering, Vol. 69, pp.86-95.

Li H., Svendsen S., Gudmundsson, O., Kuosa, M., Schmidt, D. and Kallert, A. (2016). Technological issues to supply low temperature district heating. In: Proceedings: The 15th International Symposium on District Heating and Cooling, September 4th to September 7th, 2016, Seoul, Korea

Li H., Svendsen S., Gudmundsson, O., Kuosa, M., Schmidt, D. and Kallert, A. (2016). Low temperature district heating for future energy system. In: CLIMA 2016 - 12th REHVA World Congress, 22-25 May 2016, Aalborg, Denmark, 8 pages. ISBN: 87-91606-36-5

Li, H., Svendsen, S., Gudmundsson, O., Kuosa, M., Schmidt, D., Kallert A.M., Pesch R., Lennermo, G. (2016). Low Temperature District Heating Technologies. In: Proceedings: The 15th International Symposium on District Heating and Cooling, September 4th to September 7th, 2016, Seoul, Korea.

Liu, J., Chung, D.H., Chung, M. and Im, Y.H. (2018). Development of load models and operation simulator for a building complex with mixtures of multi-type engines and renewable devices. In: Energy and Buildings, Vol.158, pp.831-847.

Rämä M., Sipilä K. (2017). Transition to low temperature distribution in existing systems. Energy Procedia 2017;116:58–68. doi:10.1016/j.egypro.2017.05.055.

Rämä, M., Heikkinen, J., Klobut, K. and Laitinen, A. (2014). Network simulation of low heat demand density residential area. The 14th International Symposium on District Heating and Cooling. Stockholm, Sweden. 4 p.

Schmidt, D., Kallert, A., Blesl, M., Svendsen, S., Li, H., Nord, N. and Sipilä, K. (2017). Low Temperature District Heating for Future Energy Systems. Energy Procedia 116 (2017), pp. 26–38.

Schmidt, D., Kallert, A.M. and Sager-Klauss, C. (2016). Optimising Community Energy Supply with Exergy Principles. In: CLIMA 2016 - 12th REHVA World Congress, 22-25 May 2016, Aalborg, Denmark, 8 pages. ISBN: 87-91606-36-5

Schmidt, D., Kallert, A.M., Blesl, M., Svendsen, S., Nord, N. and Sipilä, K. (2016). Low Temperature District Heating for Future Energy Systems. In: Proceedings: The 15th International Symposium on District Heating and Cooling, September 4th to September 7th, 2016, Seoul, Korea

Schmidt, D., Kallert, A.M., Blesl, M., Svendsen, S., Nord, N. and Sipilä, K. (2016). Successful Implementation of Low Temperature Heating Systems in Communities. In: CLIMA 2016 - 12th REHVA World Congress, 22-25 May 2016, Aalborg, Denmark, 8 pages. ISBN: 87-91606-36-5

Schmidt, D., Kallert, A.M., Orozaliyev, J., Best, I., Vajen, K., Reul, O., Bennewitz, J. and Gerhold, P. (2016). Development of an Innovative Low Temperature Heat Supply Concept for a new Housing Area. In: Proceedings: The 15th International Symposium on District Heating and Cooling, September 4th to September 7th, 2016, Seoul, Korea.

Schmidt, D., Schurig, M., Kallert A.M., Orozaliyev, J., Best, I., Vajen, K., Reul, O. Bennewitz, J. and Gerhold, P. (2016). Development of an Innovative Heat Supply Concept for a New Housing Area. In: CLIMA 2016 - 12th REHVA World Congress, 22-25 May 2016, Aalborg, Denmark, 8 pages. ISBN: 87-91606-36-5

Stehle, M., Blesl, M. and Huther, H. (2017). Case Study of Low Temperature District Heating – Technical, Ecological and Economic Framework Conditions. In: EuroHeat & Power English Edition IV/2017. 13 pages.

Tereshchenko, T. and Nord, N. (2016). Importance of Increased Knowledge on Reliability of District Heating Pipes. In: Procedia Engineering, Vol. 146. pp. 415-423.

Yang, X., Li, H. and Svendsen, S. (2015). Alternative solutions for inhibiting Legionella in domestic hot water systems based on low temperature district heating. In: Building Services Engineering Research and Technology, Vol. 9, pp. 141-151.

Yang, X., Li, H. and Svendsen, S. (2016). Decentralized substations for low-temperature district heating with no Legionella risk and low return temperature. Energy, 2016.

Yang, X., Li, H. and Svendsen, S. (2016). Evaluations of different domestic hot water preparing methods with ultra-low-temperature district heating. In: Energy, Vol. 109, pp. 248-259.

Yang, X., Li, H. and Svendsen, S. (2016). Modeling and multi-scenario analysis for electric heat tracing system combined with low-temperature district heating for domestic hot water supply. Building Simulation, 2016.

Yang, X., Li, H. and Svendsen, S. (2016). Energy, economy and exergy evaluations for supplying domestic hot water from low-temperature district heating in Denmark. In: Energy Conversion and Management, Vol. 122, pp. 142-152.
